2. Getting Started

2.1 Battery Charging

This tablet computer is equipped with a built-in Lithium-Polymer battery. System will suggest to charge when the battery is low.

Power Adapter

Connect one end of the power adapter to a socket and the other end to the DC IN jack of the device to charge the device.

NOTE We strongly recommended using the power adapter that came with the tablet computer to avoid damage to the machine.

Charging Methods

1. Plug the power adapter, the charging indicator will turn red to show that the charging is in process. When the battery is full, the charging indicator goes out.
2. You can still use tablet computer during charging.

2.2 Use of Memory Card

Insert Memory Card

Insert the memory card into the card slot and press it into the card slot until a click sound is heard. A prompt will appear on the top left corner of the screen which says: Preparing memory device.

Browse the Documents in the Memory Card

Run "My Pad" program. Display all files under the root directory and select "SD1" to open it to browse the content in the card.

Pull out Memory Card

Close all the files opened from the card: click menu, select settings → Storage → SD card 1 → Unmount SD card 1. The system will prompt that "memory device safe to remove". Gently press the card and part of the memory card will pop out. When the memory card has been removed, "Removed memory device" will be prompted on the top left corner of the screen.

NOTE

1. The memory card should be inserted correctly; otherwise it may be damaged;
2. Please do not forcibly pull out the card before the appearance of the prompt that "remove the memory card", lest that the card will be damaged;
3. Memory cards of main brands are suggested to be used to avoid the incompatibility of the card.

2.3 Hot Swapping Between Memory Card and External USB Flash Disk

Please do not carry out hot swapping when using or browsing files in memory card and external USB flash disk. Directly pull out memory card or external USB flash disk when browsing or using files in them in My Video, My Music, My Album and other software may damage the memory card and USB flash disk and they may automatically exit process for self-protection. Please refer to "2.2 Use of memory card" on insert and extract of memory card. Please close all files being used in the external USB flash disk before pulling it out.

2.4 Storage Space

The device has three storage spaces: internal storage of the device, USB flash disk or memory card. Internal storage of the device is not displayed; the displayed folder name of memory card is "SD1"; the displayed folder name of external USB flash disk is "Udisk1". System storage area can only be used for storing system files. The total internal storage space of the device is 4 GB. The storage space of USB flash disk and memory card is determined by their specific capacity.

Please refer to "9.6 SD card and Device Storage" for related specific information on storage.

2.5 ON OFF

1. **Starting Up:** When the battery has sufficient electricity, long press the power key for **2 seconds** to start up. Screen lock will be entered after starting up. Slide unlock icon upward to enter main interface; (slide it downward to turn off sound and slide it downward again to turn on sound).
2. **Shutdown:** Press the power key (4 seconds) and the system will pop up shutdown confirmation interface. Slide the following shutdown icon upward to shut down, while slide the above shutdown cancel icon downward to return to the shutdown interface.
3. **Screen Lock:** Press the power key (1 second), the system will be locked and LCD will be off. Press the power key again can wake up the system.

2.6 Interface Rotation

The system interface can automatically rotate screen according to the direction of the device. The system interface will be displayed by vertical screen when hold endwise, while by horizontal screen when hold widthwise. The rotation time of the screen is within 2 seconds. Refresh the screen to make it return to normal state after switch.

2.7 Network Connection

Wireless Network

1. Select "settings" icon under the shortcut bar of the desktop.
2. Select "wireless network" in the Settings menu .
3. Select check box behind Wi-Fi to Enable Wi-Fi.
4. Select "Wi-Fi setting" option to set Wi-Fi network.
5. All the AP devices can be found will be listed. Click the AP to be connected in the options.
6. If the AP was successfully connected before, the information will be stored. Select "connection" in the window popping up to start connection, while select "forget" to eliminate AP information.
7. If the AP is not encrypted, select "connection" in the window popping up to start the connection.
8. If the AP is encrypted, input password in the window popping up and click "connection" to start connection.
9. When the network is successfully connected, Wi-Fi icon will appear on the status bar on the top of the desktop.

3. Input Operations

3.1 Keyboard

When you use procedures or files that need to input text or numbers, the touch keyboard will automatically appear on the screen.

NOTE This device supports external USB keyboard, but when using an external USB keyboard, some keys may not be normally used.

3.2 Touch Screen

Touch screen can induct moving track of fingers, which can carry out the following operation:

Click: Select an icon and click it to select the icon or option needed

11. Lock of Tablet Computer

Unlock screen/device:

Short press the power button to wake up the screen when the system enters sleeping mode.

Slide unlock icon upward to unlock and enter the interface before system enter the sleeping mode again.

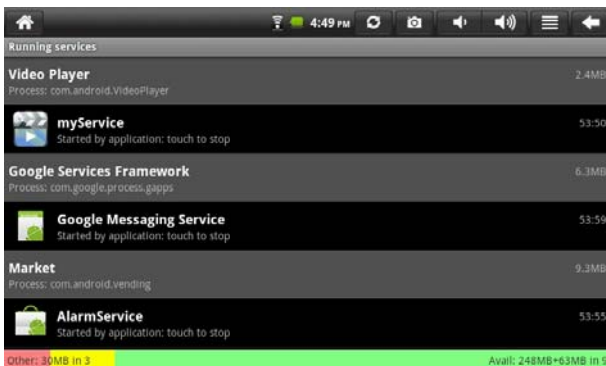

12. Troubleshooting

12.1 Close Application

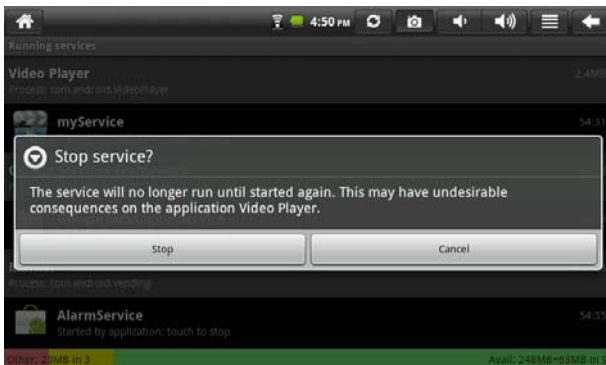

All applications having been opened will occupy memory in the device. Too many applications having been opened will influence the running speed of the device. Therefore, unused applications should be closed to reduce memory usage and keep the normal running speed of the device.

To close applications, please click the icon on the quick bar on desktop to enter system settings interface of system setup. Select applications - running services. The interface is showed as the following picture:

Click the application needed to be closed and the following window will pop up.

Click stop to close the application and the application will disappear in the windows being used.

12.2 Forced Shutdown

Long press the power key of the device for 7 seconds to force shut down the tablet computer.

12.3 Restore Defaults

To restore the device to original factory settings and clear all information, press the menu button - system settings - privacy right - restore factory settings.

WARNING After selecting to reset the device, all e-mail accounts, data and settings of system and downloaded applications will be completely deleted. Please cautiously use this function.

Umweltschutz

Seit 01.10.1998 dürfen alle verbrauchten Batterien NICHT mehr in den Hausmüll.

Die Batterien müssen zum Handel - also in die BATT-Boxen - oder zu den Sammelstellen der Kommunen zurückgebracht werden.

Bitte HELFEN SIE MIT, dass alle zugunsten unserer Umwelt mitmachen: Sprechen Sie Verwandte, Bekannte und Freunde an.

Bei weiteren Fragen oder auch, wenn der Händler um die Ecke keine BATT-Box hat, wenden Sie sich bitte an das
